

# OPERATION MANUAL

## Sensorial series

- Not suitable for children under 3.
- Read through this manual before use.
- Use under adult's guidance.

### How does it work:

- > It has an optical sensor that reads the black line drawn on a white piece of paper.

### How thick should the line be:

- > Draw a thick line that is at least a quarter inch thickness. The line must be black and totally filled in. Fig.1
- > Don't draw the line similar to the following patents. Fig.2.

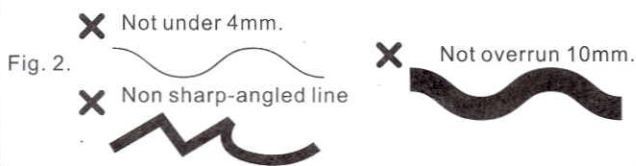

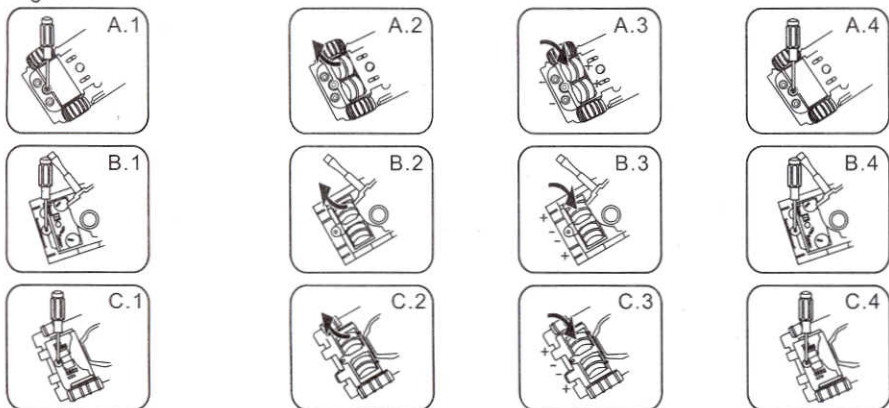

Fig. 1. Line should be a quarter inch thickness

### How to play:

- > Use an ordinary dark colored crayon or marker to draw a line on a white piece of paper.
- > Turn on switch on the bottom of the car.
- > Place car on top of the drawn line.
- > The car will run on the line automatically.
- > If the line finishes, the vehicle will continue in the direction followed from the previous line.
- > If the line is too thin, the vehicle may stray off the line. Please make the line thicker.
- > When the car runs out of batteries it will stop.
- > If the batteries have run out, replace batteries as shown below. Fig.3.

### To replace batteries:

Fig. 3.

1. Use a small phillips screwdriver to open the top of the car.

2. Remove the used button cells.

3. Place 4 new button cells in the battery compartment.

4. Replace the top and use the screwdriver to close.

### Trouble shooting:

- > If the car do not stay on the drawn track, draw a thicker line or switch to a different marker or crayon. Line must be a quarter inch thickness totally filled.

### Important:

- > Please don't play the inductive truck in the sun and near a daylight lamp or on the shining paper.

### Precautions:

- > Do not mix old with new batteries.
- > Do not charge non-rechargeable batteries.
- > Batteries should be inserted in the right polarity by adults.
- > Exhausted batteries should be removed and disposed carefully by adults.
- > The car are suitable for children ages 5 and up.
